Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on January 7, 2005 has been entered. Claim 1 has been amended. No claims have been cancelled. No claims have been added. Claims 1-7 are still pending in this application, with claims 1 and 7 being independent.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toba (GB 2,339,648) in view of Colonna et al. (US 6,115,620), as per the reasons set forth in the Office Action mailed on 11/16/0; hereby incorporated by reference.

The newly introduced limitation "as signaled by said main controller" reads on the functions performed by "reception data processing circuit 11" of Toba. (See Page 8, lines 24-26).

Response to Arguments

4. Applicant's arguments filed January 7, 2005 have been fully considered but they are not persuasive.

In response to applicant's argument that Toba and Colonna et al. "controlling display of a missed call indication by either a folding phone on the exterior of a folding phone when folding phone is folded" and switchin "between a speaker phone mode, a private mode and a standby mode based on relative positions of parts of a folding

phone”, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

Regarding Applicant’s argument that the used prior art does teach removing any particular control functions from the main controller to a separate controller; the Examiner respectfully disagrees and cites as an example Fig. 3 of Toba. Toba does not only teaches a ‘reception data processing circuit 11’ (read by the Examiner as the “main controller”), but also teaches a “power supply control circuit 14” and “control circuit 12”. The aforementioned controllers perform functions such as controlling the LCD screen and power delivered to the vibrator and LED; thus removing such control functions from the main controller (or “processor”).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
